

**Amendments to the Specification:**

Please amend the paragraph at page 10, lines 12 to 17 to read as follows:

Pattern classification system 300 comprises a processor 320 and a memory 330, which itself comprises a neural network classifier 200. Pattern classification system ~~100-300~~ accepts input patterns and classifies the patterns. Illustratively, the input patterns could be images from a video, and the classifier 200 can be used to perform face recognition.
